Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Invention II drawn to claims 8-11 in the reply filed on 9/27/05 is acknowledged. Claims 1-7 are withdrawn from consideration with regards to the prosecution of the current application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 8 is rejected under 35 U.S.C. 102(b) as being anticipated by Kagami et al. (Applied Optics, 1995). Kagami et al. teach a method of fabricating optical waveguide comprising a core and a clad characterized by that the core is patterned by using a photomask, and that width of a part corresponding to the core of the photomask is wider than the core width (page 1045).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kagami et al.

Kagami teaches the claimed invention except for the width is more than 0.5 micrometer wider than the core width. It would have been obvious to one having ordinary skill in the art at the time the invention was made to experiment with the teaching of Kagami to find the optimum value applicable to the desired specification of the fabrication process, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art.

In re Boesch, 617 F. 2d 272, 205 USPQ 215.

Allowable Subject Matter

Claims 10-11 are allowable over the prior art of record because the latter, either alone or in combination, does not disclose nor render obvious a photomask layer that patterns the core to

have the condition $M > \frac{1.45\lambda}{2\sqrt{n_{core}^2 - n_{clad}^2}}$ and in combination with the rest of the claimed

limitations.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erin D. Chiem whose telephone number is (571) 272-3102. The examiner can normally be reached on Monday - Thursday 9AM - 5PM.
